

Math 55 worksheet Wednesday 04/15/2026
--

1. What is the probability that a 5-card poker hand contains a full house (that is, three of one rank and two of another)?
2. You roll two six-sided dice. Is it more likely that their sum is 6 or that their product is 6?
3. 15 students are split into 5 groups of 3. What is the probability that Anna, Brett, and Charlie are a group?
4. What is the probability that a simple graph on vertex set $\{v_1, v_2, v_3, v_4\}$ is acyclic?
5. How many six-sided dice must you roll for the probability of getting at least one four to be at least $1/2$?
